

**DayTrippr.** We created DayTrippr to serve as the perfect platform for any explorer to find or create a plan of a day trip in NYC. The goal of the project was to implement a user-friendly app that allowed for individuals to explore cities whether they were a traveler ready to explore, or a local interested in learning new spots. In addition, we also wanted to create a platform that allowed for individuals to submit a list of their favorite activities as trip itineraries. Browse our collection of user-submitted trips to find your perfect day in New York City. Also, if you've had a great day in NYC, feel free to create a new trip and share it with the community.

(Matt Piccolella mjp2220, Linnan Wang lw2645, Darren Chen bic2106, Britain Carter dsc2155) are willing to have their names appear next to this presentation on the project web page for COMS W4170.
